Installation Instructions Chain Tension Plates F650GS/DAKAR

Contains:

- 2 x Chain Tension Plate
- 2 x Screw hex M8x70
- 2 x Washer M8

Installation:

Remove original plates on both sides of the swingarm ends to be able to install Touratech Chain Tension Plates.

Insert the chain tension plates in the swing arm ends with the bolt hole on the bottom as shown on photo above.

Press now the plates completely in the swing arm ends and attach from the back with M8x70 screw and washer M8 on both sides.

ADDITIONAL INFORMATION:

In rallye or sport use we suggest to additionally attach the plate at min. two latches with screws to the swing arm. Holes need to be bored on the swing arm for this and in some countries/states this modification may not be approved for street use !
